TIMBER CREEKTM DISTILLERY

Crestview, Florida

Florida Whiskey

Our Florida Whiskey is a Wheated Bourbon. The flavor profile is sweet and smooth. We start with our 100% Corn Bourbon Whiskey base and blend in a touch of 100% Wheat Whiskey to balance the sweetness of the Corn. The mash bill is roughly 80% corn and because of that this is our sweetest whiskey. And last we pull all of the flavors together by blending in our 100% Single Malt Barley whiskey which adds a round buttery-ness to the final blend. This whiskey is amazingly well balanced and easy to drink. To preserve the natural Florida flavors we bottle it at 93 Proof.

What is a Florida Whiskey?

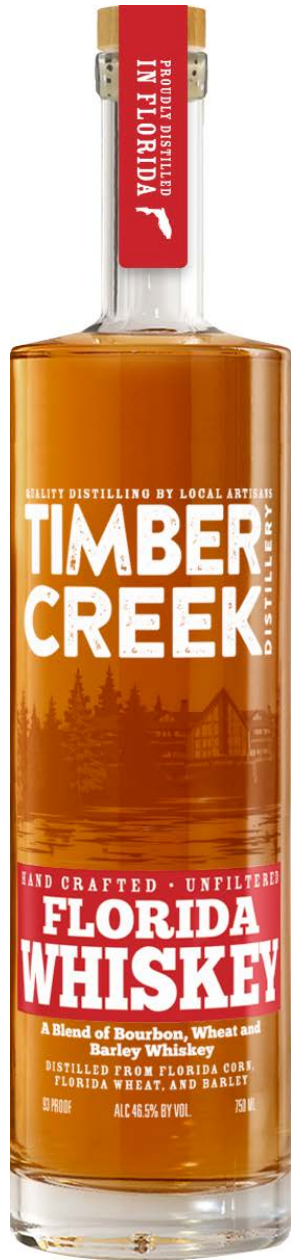

A Florida Whiskey should represent the best that Florida has to offer, and therefore a Florida Whiskey must have the following characteristics:

1. Distilled from at least 90% local Florida-grown grains
2. Uses only Florida limestone spring water
3. Aged in the heat and humidity of Florida
4. Bottled unfiltered – to preserve the unique flavors

This combination of factors will produce a distinctly rich and uniquely Florida whiskey.

Timber Creek uses a proprietary distilling and blending technique we call PureBlend®. This process is an end to end process designed to optimize flavors from each individual grain or ingredient and then blends the flavors after aging to create unique, bold, balanced, and pure flavor profiles.
